ARLAS

The ARLAS Collection API let you change the collection references of the ARLAS catalog.

URL Schema

The table below lists the URL endpoints.

PATH Template	Description
/arlas/collections/	List the collections configured in ARLAS with the technical details
/arlas/collections/ `{collection}`	Get, add or delete a collection reference in ARLAS

Managing collections

/arlas/collections/ `{collection}`

The following methods let you get, add and delete **collection references** from elasticsearch into the ARLAS catalog.
A **collection reference** is the description of the elasticsearch index and the way ARLAS API will serve it.

Method	Input Data	Output Data	Description
GET	`None`	`CollectionReference` as JSON	Return the full description of the Collection Reference
PUT	`CollectionReference` as JSON	`CollectionReference` as JSON	Add a new CollectionReference
DELETE	`None`	`None`	Size of the intervals.
